ENHANCING YOUR  
WORKPLACE FOR  
THE RETURN OF  
YOUR EMPLOYEES

# GOING BACK TO THE OFFICE

In the post-pandemic world, more and more employees are moving out of their home offices and back into professional spaces. How are you preparing your facilities for their return? Is your office set up so your employees will feel it's even worth the commute?

Your employees will need a worthwhile atmosphere that they know is safe and clean, so together let's find the right office space solutions that protect and empower them. Even with safety precautions still in mind, collaboration should not be sacrificed, and we're here to help you achieve that. After all, the workplace still matters. It's time to rebuild your community and your culture.

# WHY CLARUS?

Effective communication, idea sharing, and decision-making are key to a productive and successful work environment. By combining the exceptional writing experience of Clarus with color designed to inspire, you'll find employee productivity, engagement, and creativity will stand the test of time.

## **BACTERIA RESISTANT FOR A HEALTHIER ENVIRONMENT**

Our glass is non-porous, which inhibits the growth of bacteria, providing an extra layer of hygienic protection – all without affecting the aesthetics of your environment.

## **LOW-IRON GLASS THAT WON'T SACRIFICE QUALITY**

By removing 90% of residual iron, the green tint of regular glass is eliminated, so your board is clear to display vibrant colors and graphics. Clarus invests time, energy, and resources to purchase low-iron and low-nickel sulfide glass from a highly engineered float glass manufacturer in the USA, so you get the true color you desire, every time.

## **STAND THE TEST OF TIME**

Unlike traditional whiteboards, Clarus glassboards are exceptionally durable – they never stain or ghost, and are manufactured to last a lifetime. Clarus products provide an exceptional writing experience and boast vibrant colors designed to inspire employee productivity, engagement, and creativity for years to come.

# WHY CLARUS?

## CUSTOMIZATION OPTIONS

From custom shapes and sizes to color matching, the sky is the limit for you and your glassboard. Our glass printing technology allows us to custom print anything you desire on many of our products, so you can ensure your working and collaborative environments are enhanced with your company culture and aesthetic all throughout.

## QUALITY EVERY STEP OF THE WAY

Each order is produced with the highest standards and turned around quickly, so you can get our unrivaled quality with some of the shortest lead times in the industry. With rigorous testing of our specially sourced adhesive, we've ensured that the color on our non-porous glass is everlasting and its hardware will never fall off. We offer a best-in-the-business 20-year warranty because we stand behind the superiority of our products, and our low-iron glass is safe from the spontaneous damages that threaten lower-quality glassboards that are high in nickel sulfide.

## TRUE CUSTOMER SERVICE

Our Account Services team is ready to assist you every step of the way, even before you know what glassboard solutions are the best fit for your unique needs. Our dedicated account managers are available as a personal resource to help you ideate how glass can best serve you in your environment. We can even take your designs and apply them to your glassboards, or concept ideas for you - we're here to help!

# ADAPT

Adapt is the easy, customizable, and cost-effective upgrade for your furniture systems to enhance your office aesthetic. Compatible with over 40 office-space organization and furniture systems on the market today, Adapt provides a turnkey, smart solution that fits perfectly, every time. It allows you to install cleanable, hard surfaces around your workstations, transforming what's already there without replacing it.

# ADAPT

# GO! MOBILE™

When your layout requires you to be more flexible, our go! Mobile can be easily moved to transform any space into productive collaborative workspaces, customized to fit seamlessly into your office aesthetic. Designed to be the most designer-friendly mobile glassboard ever, go! Mobile can be used independently or ganged and nested together, making them the perfect solution for easily dividing any open work environment.

[Learn more about go! Mobile](#)

# 3-WHEEL GO! MOBILE™

Do you need a temporary solution for dividing workspaces while maintaining the integrity of your office? The three-wheel go! Mobile can be easily moved to allow you to break up tight spaces by sliding a board between desks to create separation and private writing surfaces on each side. These mobile boards can be used independently between desks or hinged together with go! Hubs, constructing temporary walls that split up work environments into configurations that meet the needs of your space.

# BE! MOBILE™

be! Mobile is the mobile glassboard for everyone. It was created with you in mind, offering the same beautiful design qualities and premium materials that you know and trust from Clarus, but with a smaller price tag.

By limiting be! Mobile's design options, we've taken the guesswork out of the mobile glassboard. We designed it to be the most accessible, affordable, and collaborative board yet, as it seamlessly integrates into any modern workspace.

# FLEX™ WALL

Flex Wall is a free-standing glassboard wall system with fully integrated, omnidirectional wheels built into the base for seamless room-to-room mobility. And when it's moved to your desired location, its revolutionary design easily transforms into a fixed, free-standing wall partition, so you can create temporary break-out rooms or office spaces without having to reroute electrical or HVAC systems.

Flex Wall Lift System

# FLEX™ MOBILE

Why give up sleek design and appealing aesthetics for safety when you can have both with Flex Mobile? Flex Mobile is the most elegantly designed, functional glassboard on wheels ever brought to market. Its wide, strong base gives Flex Mobile an Eiffel Tower elegance while providing increased functionality, mobility, and stability to the writable glassboard.

# TABLE TOPS

The versatility of a writing surface and the beauty of colorful Clarus glass — all in a tabletop. Table Tops bring a new level of collaboration and visual communication to any meeting by making every part of the table surface writable. Communicate a concept, assign seats, or jot down a question to remember at the end of a presentation — the possibilities are endless.

# DESK TOPS

Clarus Desk Tops are a quick and efficient solution to outfit your employees' workspaces with non-porous, cleanable surfaces that double as a marker board. Simply lay the Desk Top on the workstation, and it is instantly ready for use. Desk Tops' antimicrobial properties inhibit bacteria from spreading and allow for the surface to be thoroughly disinfected, creating a safe and clean environment for your employees.

# BE! SHIELD™

Keep your receptionist areas safe while welcoming visitors to your office with be! Shield. The be! Shield acts as a high quality and durable non-porous barrier between receptionists and visitors that can be easily cleaned and disinfected.

[Learn more about be! Shield](#)

# DIVIDE THINLINE™

As employees transition from the home office, they're looking for their own protected and divided workspaces as opposed to completely open-air desks. Divide Thinline acts as a barrier between working areas and can be customized to reach various heights. Like most of our products, we can custom match any glass color to coordinate with your existing furniture system, and offer translucent or opaque glass finishes.

[Learn more about Divide Thinline](#)

# VIEW™

Enhance the effectiveness and interactivity of your meetings with our View projection glass. As the first-to-market high-definition glass writing surface that can be projected on, View sets the standard for all projection surfaces to come. With its clean lines, clarity of picture, and beautiful, space-saving design, View serves as the ultimate multi-functional projection surface and focal point for your conference rooms.
