

the office is **lit** 

10 key products for returning to the office.

During the pandemic, people started working from home.

The office went dark.

Now, people are making their way back to the office.

The lights are on.

There's a buzz.

A vibe.

An energy...

the office is **lit**

The excitement isn't just about bringing employees back to the office. It's about life returning to the office. If there's one thing we've learned through the pandemic, it's that some things just can't be replaced. Spontaneous interaction. Team collaboration. Peer mentoring. This is the office culture that leads to growth and innovation—personally, professionally and as an organization.

U.S. workers continue to see the physical workplace and in-person collaboration as key aspects of their jobs—and driving reasons behind their desire to return.¹ Having a sense of place and purpose not only provides us with a common ground, it's the most inspiring way for us to innovate and grow our careers, our connections, our businesses and our brands *together*.

Yet, the office culture is being reshaped as employees return—with new expectations around flexibility, privacy and space sharing.

10 key office products

As we transition from home back to the office, we need to embrace this unprecedented opportunity for transformation—with the office strategically designed to renew confidence. Based on the conversations and interactions we've had with our corporate customers, here are the products they are using to create spaces that offer maximum flexibility, safety and productivity...spaces that are *lit*.

Only 19% of U.S. workers want to work from home full time; more than half would prefer a hybrid of working from the office and their home as they look to the future. What does this mean for the future of work and the workplace?²

Lightline®, Genius® and Evoke® Architectural Walls

Businesses are leveraging the flexibility of architectural walls. With a small kit of parts, KI modular walls are easy to reconfigure, maximizing your investment. Unitized wall construction enables numerous floorplan changes, while built-in power and data functionality allow you to keep pace with emerging technologies. Explore a multitude of finish options, including long runs of full-height glass for daylighting. Best in class STC ratings. Find out which wall product—Genius, Lightline or Evoke—or combination thereof is best for your needs.

2 Tattoo[®] Collection

Inspired by the fluidity of today's workplace, Tattoo takes a fundamentally different approach to the design of workspace furniture. Tattoo offers a dynamic solution to shifts in business. No need to draw new floor plans, order parts or schedule installation. Tattoo empowers workspace change and supports unique work styles as roles and responsibilities evolve. Elements of the collection include screens, storage, slim seating and tables.

Watch these [animations](#) to understand how you can rethink and rearrange your space— independently and on the fly.

3 700 Series® Storage

Storage is always needed. 700 Series Storage provides sizing, configuration and pricing options to fit any business need—vertical files, lateral files, pedestals, storage towers and bookcases. Sleek design and sturdy construction allow you to divide space, create work islands with optional tops and provide individual storage. A wide variety of color, style and detail options leads to spaces with a true “wow” factor.

4 Connection Zone® Lockers

Connection Zone Lockers provide temporary or permanent storage options for employees. Available in 30" and 36" widths, they are sized to accommodate binders, bags or other personal items. Contrasting door and shell colors provide a variety of design options as well as lock and pull styles. Banks of lockers can be used to direct traffic flow around open areas or delineate space.

5 Universal Screens

Universal Screens are designed to provide various levels of privacy in open environments. Fixed screens offer varying levels of privacy with multiple heights and widths, perfect for providing a semi-permanent solution for privacy. Height-adjustable screens raise or lower seamlessly. When fully depressed, the screen virtually disappears to create an inviting, collaborative worksurface. Specify in polyester felt or fabric with a range of colors. Both materials are naturally sound dampening and provide a tackable surface.

6 Backbone[®] Media Platform

With video conferencing becoming more commonplace, having a dedicated area where on-site and off-site groups can connect virtually is critical. The Backbone Media Platform is designed to support technology, optimize collaboration and enhance flexibility. Backbone has two adaptable forms: a single table unit or a multiple table unit, both of which offer ideal solutions for technology integration and media sharing. The multiple unit can easily be separated and used as individual tables or ganged together in a straight line, suitable for offline instruction or group work.

7 Serenade[®] Gathering Tables

People want to connect in person again. Serenade Gathering Tables encourage collaboration and interaction by facilitating a space for togetherness. From conference rooms to transitional spaces to cafes, durable Serenade gathering tables support any community environment. Design options include up to three contrasting laminate options—surface, legs and stringer/modesty panel. Two heights (29" and 42") and single- or double-sided depths available. Options such as power, bag hooks and footrests make the table as functional as it is beautiful.

8 WiggleRoom™ Pod

Employees appreciate the privacy of WiggleRoom Pods. Whether they need a place for a private phone call, one-on-one video conferencing or a quiet place to work, WiggleRoom pods support privacy with sound-absorbing panels and a magnetically sealed door. A motion-activated fan constantly replenishes internal pod air and optional motion-activated LED light indicates whether pod is in-use or available. Two features that provide an added sense of security with today's health concerns. Select from a range of options for materials, surfaces, seating and accessories that enhance comfort.

See the WiggleRoom in action.

9 Dōni® Stack/Guest Seating

Businesses are cheering the two-tone shell and custom color option on Dōni Seating to brand spaces in corporate colors—at an affordable price. The stack/guest seating offers 17 degrees of hip articulation, which encourages active movement and provides a comfortable sit. Easy to clean, the stack chairs are available in 4-leg, 4-leg wall saver, 4-leg with casters and sled base styles. Easy to move, all models stack 12 high on a dolly and six high on the floor.

10 MyPlace™ Lounge Furniture

With a robust variety of shapes, sizes and table options, MyPlace Lounge Furniture offers a functional space and enables an exceptional range of formations—perfect for lounges, transitional spaces and café areas. Use recently introduced 48" or 60" high-back seating for space delineation or to provide privacy within an open space; the high-back style supports power, including a unique multi-unit solution that allows up to eight power modules from just one 3-prong infeed (no hardwiring). Contrasting fabric options. Extremely durable with a 400-pound weight rating.

Explore the Endless Possibilities

If standard furniture options are not working for you or you have a desire to put a “signature” on your space, KI is uniquely positioned to bring your vision to life with modified or co-created furniture solutions. Infinity from KI is a proven way for KI to engage with you when an “outside the box” solution is needed. From custom materials and sizes to custom furniture designs, the Infinity from KI process can help provide businesses with a furniture solution to support their brand, culture and ways of working.

These workstations were co-created with a laminite gallery panel at the end for a clean look. The magnetic, markerboard material provides a nice option for name plates or other messaging. The Serenade tables butted against the gallery panels are a modified size. Together, the panels and tables create an ideal space for interaction or touchdown areas and are conveniently located in proximity to personal workspaces.

This 700 Series mobile storage unit was modified to serve as a divider between benching stations for a “cube-like” feel without requiring a panel system. The backer is magnetic markerboard, which gives it a multipurpose use. The unit can also be rolled to a different location for collaborative meetings and keeps resources close at hand.

Inspired by biophilic design, this Tattoo Flex Screen was modified to incorporate an open frame with ledges to hold plants or other small items. The screen divides space yet keeps sight lines open and allows daylight to permeate. The size and scale of this piece allows it to be easily repositioned as needed.
